DESIGNING & BUILDING YOUR PERFECT HOME

Story and Photos provided by **Stephanie Larsen Interiors**

It's certainly no secret that in the past year we've spent more time inside our homes than ever before, and as resident interior design expert Stephanie Larsen tells us, there has never been a more important time to invest in creating a space that you'll love.

Stephanie has built a career as an award-winning interior designer in Sedona and beyond, recognized for her trademark turnkey designs that transform spaces from carpets to cutlery with cultivated style and a distinctive personal signature.

Drawing from soft, neutral color palettes, rich lighting and a wide range of organic materials Stephanie's spaces draw upon the immensely restorative effects of the natural world to

create homes that are beautiful, functional and inspirational.

Now more than ever, Stephanie shares with us that she gravitates towards design elements that feel natural and organic, sourcing materials, finishes, decor and art that strengthens our ties to nature while crafting luxurious spaces that reflect a delicate balance of beauty and functionality.

Defining this union of luxury and natural design as "organic glam", we recently sat down with Stephanie to learn more about some of her current favorite pieces that embody this approach to understated elegance. **ES**
